	Examiner Gary F. Paumen	Art Unit 2833	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 49-34435 (JP '435).

JP '435 discloses insulator 10 holding contacts 12 and a ground member including plates 16, 18, each plate having slit portions 22 which engage with corresponding slit portions in the other plate, each slit having at least one arcuate contact portion 26 which protrudes from straight-line portions thereof.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 49-34435 as applied to claim 1 above, and further in view of Ichimura et al 4611867.

JP '435 substantially discloses the claimed invention except for the ground plates having ground terminal portions. Ichimura et al discloses ground plates having ground terminal portions 30b and 65, respectively, and to provide the ground plates of JP with ground terminal portions thus would have been obvious, to better ground the plates. The method limitation of punching the plates is in an article claim and is thus given little patentable weight.

Claims 3 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record, particularly the applied art, discloses or teaches an additional slit portion in the vicinity of the contacting portion so that the contact portion is brought into elastic contact with the other ground plate.

Ikola discloses similar ground plates.
